Now it is necessary to do something to protect the people up there from the enemys there and we cant continue to wait for our people to come here.

I thought of volunteering to go back and take some of them with me, but thought that you might ~~not~~ think that I was up to something.

Anyhow, I could easily get in with them, as my patterns of negetivity etc are well known and Tim Stoen was here, I could act disgruntled

etc. This is a very difficult job though, you would have to get involved, but not too involve you would have to say negetive things, but

nothing the press could use, assuming always that they carry tape recorders. I would have to contact them and play hard to get and let them recruit me themselves,

this would take time, but if ~~you~~ I played it right they might hold off other operation and concentrate on me, if they thought they could get ~~to~~ me to do something for them.

Perhaps if I was back there halfway in and halfway out, like if demanded to go back but didnt fully want to leave and had somebody in the church beat me up with bruises etc that those outside could see.

Mecky T. used to always try to get me to fuck her in Santa Rosa (over)

NIB-126

I could let her think that she had a hold on me, I'm good at playing stupid and calculating people. Most of the college student traitors would underestimate me and Tim would think I crazy and unstable. If I could get them together in strategy session, having been here since Tim left etc, I would prefer Potassium Cyanide and Hydrochloric acid to a bomb, it could be made to look like a final act of conscience or a guilt and suicide and if there were no contacts or proxy with the church they could pin it on you, especially if I went to see a shrink up there and showed some paranoid tendencies, but not enough to get committed. Even if I could string them along for awhile I could set them up individually or even get shot to death in bed with Tim Stoen, and ~~set Grace up as the~~ frame Grace as the killer.

Many things are possible, I wouldn't get caught up in their shit, I hate the States, and Chris was a personal friend.
